

Archive Fantasy Miniatures

www.DnDLead.com

Archive figures are easily recognizable on account of their unique base. The base is rectangular, but with the corners cut off so as to resemble a lengthened octagon. Most have a clear date engraving of 1976 or 1977 along with the words "Archive" or "Nevile Stocken," the sculpter? They generally also have the serial number engraved on the base as well - the question is always if one can read all the base markings as they are often illegible. Some miniatures do not have bases and those can only be identified through pictures, though once one gets a feel for Archive, they are very easy to identify as Archive since they have a very unique flavor.

Elric

- 301 Dragon Warriors of Imrhyrr
- 302 Warriors of Chaos
- 303 Sardik-Elric's Father
- 304 Devil Beast of Pan Tang
