Ral Partha Ent.

I would like to welcome you to the 1979 edition of the Ral Partha catalog. This catalog has a separate price sheet that lists the prices by page number. Item numbers in parenthesis indicate figures to be released later in the year.

Ral Partha is continually upgrading the quality of its figures. For example, the "Ancient" line has recently had most of the figures re-designed or improved upon. The re-designing took place to reflect new historical information. The other improvements were made to enhance the structural design, attaching weapons, or both. The spear and pikes still come separate, but most other weapons are attached. The command groups for most of the nations of the "Ancient" line should be out this year, and new horses have been designed to comply with the research in the "Armies and Enemies" books. As soon as all the re-work is completed, the "Medieval" line will be improved in the same manner.

You may now charge your orders to Visa or Master Charge. You may phone in orders C.O.D., or you may charge them. Any order over \$30 receives a 10% discount. On any orders of \$100 or over, we will bulk pack the figures to your specifications. Thus, you may order any number of figures and pay the packaged price instead of the individual price. You could put together an order with some friend or your club, and get exactly the number of figures you need. The only prerequisite is that the order must be \$100 or more, and all items must be from the same line. Remember... you will receive a 10% discount on an order of this size.

Ral Partha has added four new lines of figures. The 25 mm. "Waterloo Collector Series" should appeal to all who have an interest in the later Napoleonic Wars. The "Royal Armies of the Hyborean Ages" will answer some of the prayers of those of you who loved Conan. The "Fantasy Collector Series" figures are --in my opinion-- the best designed fantasy figures on the market, and I hope we can add men and goblins to this line in the near future. The "Condottiere" will surely set the standard for the industry. Designed by Tom Meier, these figures have more detail than most 54 mm. figures on the market. At this date, I feel there is no equal to Tom's in overall design. Many of his figures come alive with their detail and facial expressions.

This catalog is quite a bit larger than last year's -- I hope you find it satisfactory, and I hope you enjoy our figures.

If you have any questions or suggestions, feel free to call or write me --I am always interested in a good idea.

Sincerely,

GLENN E. KIDD
President
